

High Performance Paddy Separator

# PADDY SEPARATOR

PS200D / 400D / 800D / 800DR

PS800D

**SATAKE CORPORATION**

# PADDY SEPARATOR

## Specifications

Model	PS200D	PS400D	PS800D/DR
Required Power (kW)	0.75 (4P)	2.2 (4P)	3.7 (4P)
Output Capacity (t/h)*1	2~2.5	3.5~5	7~10

\*1 Brown Rice, Long Grain.

## Dimensions

PS200D

PS400D

PS800D/DR

Model	W (mm)	L (mm)	H (mm)	Weight (kg)	Volume (m³)
PS200D	1,330	1,760	2,220	970	5.7
PS400D	2,230	1,870	2,240	1,670	9.4
PS800D/DR	3,130	1,760	2,360	2,250/2,300	14.0

The Satake Paddy Separator PS is an oscillation-type paddy separator with a very high sorting performance and an easy maintenance design.

All varieties of rice such as long grain, medium grain and short grain can be sorted easily and accurately.

It separates a mixture of paddy and brown rice into three distinct classes: paddy, mixture of paddy and brown rice and brown rice, to be sent to a husker, back to the paddy separator and to a rice whitener, respectively.

## FEATURES:

### 1. Stable Performance:

Adjustment during operation is not necessary because of its constant and stable separating performance.

### 2. Minimized Installation Space:

Compact design and large capacity means that installation space for a given separating capacity is very small.

### 3. Automatic Stop Device:

Machine automatically stops when the tank is nearly empty.

### 4. Easy Sampling:

Samples of brown rice can be taken from a special outlet by diverter valves, for easy inspection of quality and flow rate.

### 5. Easy Inspection of Separating Condition:

The discharge side is covered with a transparent cover so that the separating conditions of the grain are easily checked.

### 6. Easy Flow Adjustment:

Flow rates are adjusted by a manual remote lever on "D" model and by increase / decrease buttons on "DR" model.

All Satake products are the subject of continuous development and, as a result, their specification may change and differ in detail from those shown.
